Alfalfa		Crude Protein (Min.)	15.0%
Weight: 50lbs (22.7kg)		Crude Fat (Min.)	1.8%
		Crude Fiber (Max)	30.0%
		Moisture (Max)	12.0%

Feeding Instructions — Stampede Alfalfa Cubes

Stampede Alfalfa Cubes may be fed dry directly from the bag or soaked in water to create a grain and forage mash. Soaking is optional and not required for proper digestion.

Substitution: Replace standard hay with Alfalfa Cubes on a weight-for-weight basis.

Feeding Options: Alfalfa Cubes may serve as the sole forage source, as a component of a broader forage program, or as an occasional supplemental feed to hay.

Placement: Feed at ground level, either in the pasture or in your horse's designated feeder.

Daily Quantity: When used as the sole forage source, provide a minimum of 10 pounds per horse per day. Adjust the amount as needed to maintain your horse's ideal nutritional needs and energy level.
